The Till People™

www.c2epos.com

An affordable solution to help manage your retail outlets.

In today's competitive market place and adverse trading conditions, cutting costs whilst increasing profitability and efficiency is a high priority for many high street businesses. Working closely with some of the industry's top 75 companies we have developed an EPOS solution that helps address these challenges and streamline their daily procedures. As a result we can now offer these advanced features to you at an affordable price.

Some examples of how our solution can help your business:

Centralised reporting

- Consolidated week on week central reporting can alert you to high wastage or low selling product lines.

Shop ordering

- Assistance to shop managers with their ordering by offering an optimum order quantity based on previous sales, wastage and sell out times. This can help save short shelf life stock going to waste, directly reducing your costs.

Communication with your outlets

- The ability to communicate with your outlets by sending messages straight to the EPOS screens ensures your staff are always up to date with any production problems, delivery errors or product recalls. This can help eliminate chain of communication problems often found within multiple outlet businesses. With the real time message acknowledgement you will always know if the messages have been read.

Performance incentives

- Provides you with staff sales performance statistics by outlet to enable you to reward top performing outlets and staff.

Live and historical sales statistics

- Monitor outlets sales performance throughout the day to help plan your staffing levels.
- Real time sales analysis of your product lines via the live sales feed can highlight customer purchasing trends by area, product and time.

Customer Promotions and Loyalty

- Flexible loyalty schemes can be introduced to incentivise your customers to return by linking EPOS based promotions to loyalty cards so that you can offer deals such as "your 6th coffee free". Customers can accumulate and redeem loyalty rewards at any outlet they visit.

Integrated contactless credit card

- Our integrated credit card and contactless payment systems improve accuracy at the point of sale and leaves you safe in the knowledge that a cashless sale will not be missed.

Service and Support

Because we provide a complete solution, we have trained our experienced **24 hour helpdesk** staff to deal with all aspects of the system including hardware and software. Our friendly and expert approach will identify and resolve any problems quickly and efficiently, with all the technical issues dealt with by us. You don't have to be an IT expert when you choose our solution.

For more information give us a call on 01884 255456 or find out more at www.c2epos.com.
